Name	**Imoru Mayowa Peter**
Student ID/Registration No	**202521396FD**
Course Code	**Lab _SBT_DF 204**
Lab Title	**Reconstructing Suspected Drug Trafficking From Chrome Web History**
Recommended Environment	**Windows 10/11 host, CMD**
Submission Format	**One PDF report plus the created files and-output evidence files**
Course Code	**SBT_DF 204**
Instrustor name	**Aminu Idris AMCPN**
Date	**10 Octomber, 2026**

EVIDENCE ONE

EVIDENECE TWO;

The Edge browser metadata shows that the user's active tab was the ICDFA E-Campus Portal assignment page, indicating they were working on the case study at that time. In the background, several other tabs were open, including multiple Digital Compliance Acceptance Certificates and an Official Examination Schedule. This demonstrates the user's browsing context: the assignment was being viewed while other academic documents remained accessible in background tabs.

EVIDENCE THREE;

The Edge browser tabs metadata shows that the user's active tab (IsCurrent=true) was the ICDFA E-Campus Portal assignment page, indicating they were working on the case study. Other tabs (IsCurrent=false) included multiple Digital Compliance Acceptance Certificates and an Official Examination Schedule. This demonstrates the user's browsing context: the assignment was being viewed while other academic documents remained accessible in background tabs.

EVIDENCE FOUR;

The Edge browser tabs metadata shows that the user's active tab (IsCurrent=true) was the ICDFA E-Campus Portal assignment page, indicating they were working on the case study. Other tabs (IsCurrent=false) included multiple Digital Compliance Acceptance Certificates and an Official Examination Schedule. This metadata provides important context about the browsing session, showing that the assignment was being viewed while other academic documents remained accessible in background tabs.

EVIDENCE FIVE;

The Edge browser tabs metadata shows that the user's currently active tab (IsCurrent=true) was the ICDFA E-Campus Portal assignment page, confirming they were engaged with the case study. Other tabs (IsCurrent=false) included multiple Digital Compliance Acceptance Certificates and an Official Examination Schedule. This metadata provides important context about the browsing session, distinguishing between what the user was actively viewing and what remained open in the background.

EVIDENCE SIX;

The Edge browser tabs metadata shows that the user's active tab (IsCurrent=true) was the ICDFA E-Campus Portal assignment page, confirming they were engaged with the case study. Other tabs (IsCurrent=false) included multiple Digital Compliance Acceptance Certificates and an Official Examination Schedule. This metadata provides important forensic context, distinguishing between what the user was

actively viewing and what remained open in the background during the browsing session.

EVIDENCE SEVEN;

The Edge browser tabs metadata shows that the user's active tab (IsCurrent=true) was the ICDFA E-Campus Portal assignment page, confirming they were engaged with the case study. Other tabs (IsCurrent=false) included multiple Digital Compliance Acceptance Certificates and an Official Examination Schedule. This metadata provides important forensic context, distinguishing between what the user was actively viewing and what remained open in the background during the browsing session.

Evidence ID	**What to Capture**	**Example Types of Findings**	**Why It Matters**	**SQL**
E01	First critical record	Suspicious login timestamp, unusual browsing activity	Establishes timeline of potential incident	sql SELECT url, datetime(last_visit_time/1000000-11644473600,'unixepoch') AS visit_time FROM urls ORDER BY visit_time ASC LIMIT 1;
E02	Second key record	Visit to flagged domain or phishing site	Shows exposure to malicious content	sql SELECT url, visit_count FROM urls ORDER BY visit_count DESC LIMIT 1;
E03	Third key record	Download event or file access	Indicates possible data exfiltration	sql SELECT target_path, datetime(start_time/1000000-11644473600,'unix

				epoch') AS download_time FROM downloads;
E04	Fourth key record	Deletion/clearing of history	Suggests attempt to conceal activity	sql SELECT url, title FROM urls WHERE url LIKE '%login%';
E05	Fifth key record	Account credential entry	Links user to specific action	sql SELECT url, title FROM urls WHERE url LIKE '%login%';
E06	Sixth key record	Repeated pattern (e.g., multiple visits to same site)	Demonstrates intent or persistence	sql SELECT url, datetime(last_visit_time/1000000-11644473600,'unixepoch') AS visit_time FROM urls WHERE url LIKE '%phishingdomain.com%';
